

INSTALLATION INSTRUCTIONS

Fig. 1: Prepare site and plant seedling according to nursery or forester instructions. Add Right Start® Fertilizer packet to help get seedlings off to a good start.

Fig. 2: Gently slide 'Tubex' treeshelter (flared end up) over the seedling.

Fig. 3: Push base of the shelter 1" into the soil. If the ground is too hard, mound soil around the base to form a seal.

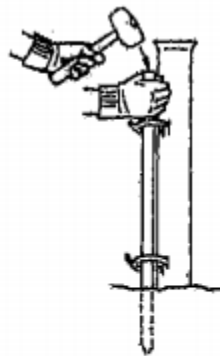

Fig. 4: Insert white oak stake into the two ties and drive into the ground until the top of the stake is 2-3" above the top tie.

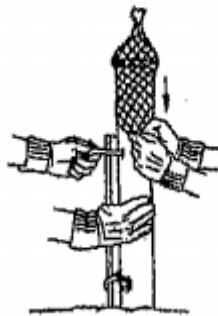

Fig. 5: Cinch the tie to securely fasten the stake and pull the mesh netting down over the flared end.
